QUICK, FOR CLOTHES CARE

Colors of clothing can be altered
from foodstuffs, cosmetics and per-
spiration that have been permitted
to stay in garments. These color
changes often show in acetate fab-
rics where blue or green turn white,
or dark blue or black turn red. These
color changes can be corrected, if
the professional drycleaner gets
them soon after the soil. Otherwise,
the color change may be perma-
nent.
