A store may not immediately come to the mind of a prospect when special services are desired; such as are offered by a Beauty Salon, Radio or Watch Repairing Department. Many establishments, realizing this, advertise under several classifications in the Classified Telephone Directory. Thus they direct more business their way.

It's easier to understand  
and jot down numbers too,  
if they are spoken in  
sequence with pauses  
between groups of numerals.  
For instance, in reading  
aloud the telephone  
number of our business office,  
we would say, "Two  
two four (pause) six two,  
six one."
