Alberta Personality Development Assoc

**THERE'S A REVOLUTION
GOING ON!**

**Self-Hypnosis and Scientific
Self-Suggestion**

During the past decade, there has been
an intense renewal of interest in all branches
of medicine, including the applications of
hypnotherapy.

The objective is to present sophisticated
and useful hypnotic techniques to equip a
person for the various problems, experienced in
life. Self-hypnosis and scientific self-suggestion
reveals a method for achieving well being and
peace of mind. You are shown how to switch
off unnecessary tensions and how to tap
energies you never dreamed you possessed.

You are taught how to turn your un-
conscious mind into a powerful ally in the
struggles for a healthier, happier life; how
the body's natural recuperative powers can
restore potency to physical, mental and
emotional functioning; how to resolve inner
conflicts that block the free flow of hidden
resources.

By implanting positive suggestion in your
unconscious mind, you can effectively eliminate
doubt, fear and psychosomatic ailments.
Through a series of exercises designed to
achieve physical relaxation in progressive steps,
nervous energy can be diverted into constructive
outlets instead of being channelled off into
damaging tensions and negative thoughts and
emotions.

The projected end result of these group and
individual sessions is to achieve greater mental
and physical efficiency within your life, al-
lowing you to become more creative, productive
and positive in your attitude and actions so
you may confidently progress, knowing you may
achieve those objectives in your life without
fear, doubt and negative mental blocks.

To quote from Hippocrates: "... Nothing
should be omitted in an art which interests the
whole world, one which may be beneficial to
suffering humanity and which does not risk
human life or comfort."
