**THERE'S A REVOLUTION  
GOING ON!**  
**Self-Hypnosis and Scientific  
Self-Suggestion**

During the past decade, there has been  
an intense renewal of interest in all branches  
of medicine, including the applications of  
hypnototherapy.

The objective is to present sophisticated  
and useful hypnotic techniques to equip a  
person for the various problems, experienced in  
life. Self-hypnosis and scientific self-suggestion  
reveals a method for achieving well being and  
peace of mind. You are shown how to switch  
off unnecessary tensions and how to tap  
energies you never dreamed you possessed.

You are taught how to turn your un-  
conscious mind into a powerful ally in the  
struggles for a healthier, happier life; how  
the body's natural recuperative powers can  
restore potency to physical, mental and  
emotional functioning; how to resolve inner  
conflicts that block the free flow of hidden  
resources.

By implanting positive suggestion in your  
unconscious mind, you can effectively eliminate  
doubt, fear and psychosomatic ailments.  
Through a series of exercises designed to  
achieve physical relaxation in progressive steps,  
nervous energy can be diverted into constructive  
outlets instead of being channelled off into  
damaging tensions and negative thoughts and  
emotions.

The projected end result of these group and  
individual sessions is to achieve greater mental  
and physical efficiency within your life, al-  
lowing you to become more creative, productive  
and positive in your attitude and actions so  
you may confidently progress, knowing you may  
achieve those objectives in your life without  
fear, doubt and negative mental blocks.

To quote from Hippocrates: "... Nothing  
should be omitted in an art which interests the  
whole world, one which may be beneficial to  
suffering humanity and which does not risk  
human life or comfort."
